

SURFACE BONDING CEMENT

SURFACE BONDING CEMENT is a cement based, polymer modified, fiber reinforced, waterproof coating designed to be applied by trowel over dry stacked block, rigid insulation board, masonry and concrete surfaces. It's high impact resistance, make it an ideal crack resistant finish.

- High impact resistance
- Waterproofs and seals
- Increases tensile and flexural strength
- Load bearing and non-load bearing walls
- Retaining walls
- Foundation walls
- Over rigid insulation board
- Increases fire rating of wall system
- Structural coating for dry stack block construction
- Meets ICBO, BOCA and SBCCI allowable design stresses

Waterproofing Cement	Apply by trowel from 1/8" up to 3/8"
Packaging	50 lb bag (49/pallet)
Coverage per 50 lb bag	1/8" = 50 ft ² 1/4" = 25 ft ²
Application Temperature	Ambient & surface temperature must be 40°F or above and will not fall below that for 48 hours
Mixing per 50 lb bag	6 quarts of water
Working Time	15-30 minutes at 70°F
Set Time	24 hours at 70°F
Colors	Gray and White
