

XTREME-BOND STONE MORTAR

XTREME-BOND STONE MORTAR is a select blend of aggregates, Portland cement, dry polymers & special additives designed to provide optimum bond when installing thin-stone veneers, thin-brick, & large format tile over properly prepared substrates (interior/exterior applications).

- Polymer modified
- Exceptional sag resistance
- Superior bonding & flexural strengths
- Water resistant
- Meets requirements of Type S mortar
- Pre-blended for quality consistency for each batch
- Reduces labor cost associated with set up and clean up
- Helps minimize cost of wasted materials left on job site
- Interior and exterior applications

Mortar/ Adhesive	Apply using notched trowel
Packaging	50 lb bag (49/pallet)
Coverage per 50 lb bag	<ul style="list-style-type: none"> • 70-80 ft² (1/4" x 1/4") • 50-60 ft² (1/2" x 1/2")
Application Temperature	Ambient & surface temperature must be 40°F or above and will not fall below that for 48 hours
Mixing per 50 lb bag	5-1/2 quarts of water
Working Time	60 minutes at 70°F
Set Time	24 hours at 70°F
Colors	Gray
